## CORPORATE PROFILE

Entraco Group of Companies, under the flagship of Entraco Venture Corporation Pte Ltd is a leading one-stop service provider of corrosion prevention for the marine, oil and gas, construction and infrastructure industries in Singapore. Originally started as a sole proprietorship under the arm of Entraco Marine Engineering in 1995, it has since grown to become a renowned brand in the corrosion prevention industry, serving major shipyards in Singapore, international ship owners, rig builders and the construction industry. Besides providing services for FPSO/FSO conversions, ship/tanker repair and cleaning works, the Group through mergers and acquisitions has expanded its capabilities to provide integrated Engineering, material Procurement, Construction, Installation, and project Management (EPCIM) for the onshore and offshore oil & gas industries.

The Group has also embarked on total business solutions through the provision of zinc galvanizing services, marine paints supply, trucks rental and property investment. In addition, Entraco, together with our strategic partners, has invested and managed an offshore spread of equipment including eco-friendly hull treatment systems, the supply of tug boats, barges and worker dormitories.

With the growing demand for marine, oil & gas sub-contracting works locally and regionally, our in-house facilities and technical capabilities enable the Group to undertake turnkey projects including design, steel fabrication, modules construction, skid packaging, ship/vessel/tanker repairs, zinc galvanizing, tank cleaning and coating in accordance to the ISO-9001 Quality Management System.

## VISION

To build eco-friendly business solutions and be a choice service provider in the marine, oil and gas, construction and infrastructure industries
